

GemSeal® Black Diamond™

GemSeal Black Diamond pavement sealer is a new, high-performance alternative to asphalt emulsion (AE) sealers. With all the environmental benefits of AE sealers, Black Diamond exceeds AE performance by providing better coverage, greater durability, and superior color stability. Black Diamond also provides performance similar to refined tar sealers through ease of application and toughness against power steering marks. Finally, like all GemSeal pavement sealers, we make Black Diamond with our precision colloid mill system, giving you a product that will always be consistent to save you time on the job.

DURABLE

- Resists fuel and oil comparable to refined tar sealers
- Resists power steering marks better than AE sealers
- Can be applied in lower temperatures than AE sealers

ECONOMICAL

- Higher dilution rate than AE sealers, which reduces cost per gallon
- Longer lasting than AE sealers

CONSISTENT

- Color stable – eliminates bluing or graying issues
- Manufactured using colloid mill process

SAFE & EASY TO USE

- Conforms to industry-leading quality control program
- Burn free – crews will love to work with it!
- Applies as smoothly as refined tar sealers
- Meets or exceeds ASTM D140, ASTM D529, ASTM D466, ASTM D2939; GemSeal Black Diamond does not contain refined coal tar but does meet the performance standards listed in: ASTM D5727, ASTM D3423, ASTM D490, FAA P-625, P-627, and P-630

GemSeal manufactures, supplies, and specifies pavement preservation products nationwide, including sealers and additives, lot marking paints, crack sealants, pothole patches, primers, tools, and equipment. For nearly 60 years, we have been defined by our products, value, delivery, and customer support. We guarantee exacting quality control and consistent results on every jobsite nationwide.
